

Information about "PFAS"

Beck Sensortechnik GmbH
Ferdinand-Steinbeis-Strasse 4
D-71144 Steinenbronn
Germany

To whom it may concern,

We are committed to transparency and regulatory compliance regarding the presence of per- and polyfluoroalkyl substances (PFAS) in our products. Based on current knowledge and information provided by our suppliers, we believe that our pressure switches and pressure transmitters do not contain PFAS substances in concentrations relevant to the emerging regulatory standards under development in various jurisdictions, including the European Union, the United States, and Canada.

– While regulatory definitions, acceptable concentration thresholds, and test methods for PFAS are still under review and may evolve, we maintain stringent quality control measures to ensure our products meet existing standards. However, due to factors beyond our control, such as potential exposure during transport and within the supply chain, we cannot entirely exclude the possibility of trace contamination from external sources.

We will continue to monitor developments in PFAS regulations and testing methodologies to ensure compliance and provide updates as necessary.
